

Sustainable Cities + Eco-Housing

Stefan Boltz - Senator for Building,
Environment and Traffic Bremen

Sustainable Cities and Eco-Housing

5 questions – 5 answers

- Why ?
 - see climate chaos
- Where ?
 - in all global cities
- When to start ?
 - now, fast and clever
- How ?
 - see best examples -
begin locally
- For whom ?
 - All for the children !

Sustainable Cities and Eco-Housing

Experiences in Bremen, Germany:

We need more integrated approaches in urban planning and architecture

You can achieve best results by designing mixed used neighbourhoods with offices, shops and residential units avoiding unnecessary mobility

Design attractive + sustainable houses !

Sustainable Cities and Eco-Housing

Experiences in Bremen, Germany:

Our program „Bremen – City at the river“
was successful to bring people from the edge
of town near to the city centers again

They live in their full service neighbourhoods
and identify themselves with the place again

They like to live close to nature in well
preserved natural environments

Sustainable Cities and Eco-Housing

Experiences in Bremen, Germany:

We have to educate people to be aware of the complex and dangerous global situation and behave in a different - more ecological way
That is why we organize special pilote projects like the popular Science Center Universum, the solar-village „Auf dem Krüge“ and renovate and update old houses

Sustainable Cities and Eco-Housing

Experiences in Bremen, Germany:

We need to train architects and builders
how to achieve the best results

Legislation can improve the technological
standard of houses to influence the market

In the end it is up to the customer – they have
to like the new designs...

Architects have to design attractive Eco-Houses!
